

SERVICE OPTIONS JANUARY 2007

Standard Service:

- Standard service is based on back log, but typically tests initiate two weeks from receipt of test samples and requisition form. To get current scheduling, contact AFTL by phone or fax.

Rush Service:

- Test duct space for rush services is limited, AFTL should be contacted in advance to ensure availability.
- Rush service options are available for ASHRAE 52.1 and ambient particulate testing only.
- Initiation times are based on a Monday through Friday business week
- A test is not considered in-schedule until samples have arrived at our facility with all order forms complete and purchase order or prepayment included or sent in advance.

Express service will initiate testing with 72 hours of order completion and receipt of samples. This service option will increase the test price by 30%.

Expedited service will initiate testing within 48 hours of order completion and receipt of samples. This service option will increase the test price by 50%.

Urgent service will initiate testing within 24 hours of order completion and receipt of samples. This service option will increase the test price by 100%.
